

ZIGBEE / ETHERNET METER DATA COLLECTION PLATFORM

FEATURES:

- ◆ Zigbee co-ordinator for ECM Power Meter
- ◆ Ethernet gateway
- ◆ Built-in buffering
- ◆ Compatible with WattsOn-Mark II & ETnet
- ◆ Customizable using Python
- ◆ Compatible with a variety of IoT services

The Elkor Hive Gateway enables IoT connectivity of Elkor's metering devices with the Cloud. The built-in Zigbee co-ordinator allows for connection and aggregation of ECM device networks. Additionally, the Hive Gateway supports WattsOn-Mark II meters with either native Ethernet or via a ETnet connection.

The Hive Gateway may be used in conjunction with the Elkor Cloud platform for straightforward monitoring of power and energy with trending, graphing, aggregation and exporting capability.

Highly flexible design allows for remote device management and easy customization to allow interoperability with a variety of cloud providers, including custom services.

Plug-and-play design will auto detect and configure devices.
